FOR VETS, GROOMERS & DAYCARES

Your clients arrive with the real history.

Leash Life is one shared feed for every pet and every person in the house. Water, appetite, potty and meds get logged by the family as it happens, so the exam room starts with facts instead of guesses.

Health card in one tap

Meds, vaccines and weight per pet. Owners hand your team a clean health card from their phone.

Your records, imported

Owners upload your clinic's PDF and the pet profile fills itself. No re-keying.

Fewer missed doses

Every entry carries a name and a time, so nobody double-doses and nothing gets skipped.

Built for the bad day

Lost-pet alerts, QR and NFC collar tags, and a fire-rescue card. Free on every plan, always.

Breed-aware walk weather

A French Bulldog hits “too hot” long before a Golden. The app knows the difference.

Every species

Dogs and cats, plus rabbits, birds, reptiles, small pets, and the barn: horses, goats, chickens and more.

Free counter card for your front desk

A 5×7 card with a QR code clients scan while they wait. We send it print-ready, at no cost. It's included on the next page.

Free to start for families. No card, no countdown, every pet included.

Leash Life

“Did anyone feed her?”

One shared feed for every pet and every person in your house. Walks, meals, meds, all in one place.

Scan to start free

No card. Every pet. Every human.
